

CECIP Newsletter January - Global Edition

Dear CECIP members,

Together with our International Partners from China, Japan, and the US we prepared the second edition of the Global Weighing Industry Newsletter. Where the CECIP newsletter focusses on the developments within Europe, the global newsletter aims at informing members about the developments in the different regions. The newsletter is also distributed amongst the members of CWIA (China), JMIF (Japan) and SMA (US). It is only available as pdf document and only in English. You can find the newsletter [here](#).

Kind regards,

Tim Hamers
